

Career Objective

Seeking a good position in an organization that gives me an opportunity to work in a competitive and challenging environment that allows me to effectively make use of my skills and give me a scope to enhance my capabilities and intellect.

Education

B.Tech, Computer Science Engineering (Game Development and UI/UX Design)

KL University (2022–2026)

Percentage: 86%

Class-XII

Sri Chaitanya Junior College (2020–2022)

Percentage: 74%

Class-X

Sri Chaitanya School (2019-2020)

Percentage: 100%

Technical Skills

- **Programming Languages:** C, OOP's(basics)
- **Database Managemnt and PL/SQL:** MySQL
- **Tools:** VS Code, Git

Projects

• Hospital Management System (Python, Django)

Developed a hospital management system allowing users to search for available doctors, view schedules, and book appointments. Implemented a user-friendly interface with database integration for efficient scheduling and appointment management.

• E-commerce Platform (MERN STACK)

Built a full-featured e-commerce platform with secure user authentication, product management, and integrated payment processing. Designed a scalable architecture with database integration to ensure smooth shopping and checkout experiences

• Weather Forecast (Python, Django)

A simple weather forecast application where you can search for any location and get real-time temperature and forecast details. The background images also change dynamically according to the time of day and temperature.

• Bus reservation System (Python, Django)

Developed a simple bus reservation system enabling users to search buses, view schedules, and book tickets with real-time availability. Implemented a user-friendly interface and integrated database management for efficient booking and schedule handling.

AREAS OF INTEREST

- Full-Stack Development for scalable and user-centric applications
- Game Development and designing in unity

Internship

• Slashmark (AICTE).

June 2024 – July 2024

Internship on Full-Stack Development

Gained experience in full stack development to build beginner to advance projects

CERTIFICATIONS

- Certified as Unity User: Programmer
- Certified as Microsoft Azure Fundamentals (AZ-900)
- Certified by Slashmark in completion of full stack development internship
